Well, the game it is not bad like the people say, have some moves and good fight system like another games, it can be enjoyable if you want feel like fighting in the arena and have good performance cause run smoothly all the time. Obviously, get it when come to the Promo Sales, it worth!. Another Similar Games for Reference: " I, Gladiator ".. Dear Mr. Developer, Your game sucks.. Wow. Con: The game. Pro: Didn't have to wait much time for the cards.. This game was terrible. I played it for about five minutes and decided I'd rather stick a fork in my eye. The controls are difficult at best, and convoluted at worst, please do not support this company by buying a game that feels like Shaq-Fu met with Gladiator. Thank you.. For \$20 I think I'd have a better time lighting myself on fire.. Looks good on the images and trailers, buuuuuuuut the execution is not so good. The controls are too complicated, and the game gets repetitive after 10 minutes. Maybe with some patches.. Dead Game is Dead.
